Employment Field

PRIMEX 1800 is an aliphatic polyurethane in water emulsion, studied for full grain and corrected grain application where particular adhesion characteristics are needed. It may be used alone in base coat or in combination with wax emulsions and proteinic products to boost the adhesion of both basecoat and following coats . It is generally applied by spray machine or roller coat .

TYPICAL CHARACTERISTICS:

- excellent penetration*
- ultrafine particles*
- excellent rub wet resistance*
- good flexibility*
