

PRIMEX 25

Description

Acqueous solution of aliphatic polyurethane in very fine particles.

Specifications

Dry residue (%) 20 ± 2

pH $7,5 \pm 1$

Employment Fiel

Aqueous solution of aliphatic polyurethane. It forms a soft and elastic film, very suitable for all kinds of finishing with good adhesion and softness, keeping a natural appearance. It is also used in glazable and polishable prebottom, in order to increase the elasticity and the filling power of the mixtures, giving to the leather a good touch and a natural look.
