

PRIMEX UB 581

Description

Polyurethane in water emulsion.

Specifications

<i>Appearance</i>	<i>Translucent liquid</i>
<i>Total solids (%)</i>	<i>19 - 21</i>
<i>pH</i>	<i>7,5 - 9,5</i>
<i>Charge</i>	<i>Anionic</i>

Employment Field

Primex UB 581 is a soft ultrafine particle size polyurethane emulsion in water studied to improve adhesion characteristics on difficult leather surface. It is very soft with excellent penetration characteristic allowing recoatability also on oily type of finishing.

Used in impregnation to improve grain brakes defects both in full grain leather and in corrected grain without hardening the leather.

Primex UB 581 is useful in any type of finishing when adhesion is needed and is compatible with all the commonly used finishing products
