

## BINDEX 624/2

---

### Description

Acrylic polymer in water emulsion, with an organic component.

---

### Specifications

|                          |                       |
|--------------------------|-----------------------|
| <i>Appearance</i>        | <i>White emulsion</i> |
| <i>Active matter (%)</i> | <i>20,0 +/- 1,0 %</i> |
| <i>pH</i>                | <i>5,5 - 6,5</i>      |
| <i>Charge</i>            | <i>Anionic</i>        |

---

### Employment Field

*Bindex 624/2 is a micro binder acrylic emulsion in water forming a non tacky film with very high resistance to heat and light exposure.*

*The ultra fine nature of its particle gives it an excellent penetration characteristic, suitable for impregnation coat. It is useful for full grain leather and usually for the soft and elastic leather (garment). Used in the basecoat it improves the finishing adhesion.*

*It can be used also in the drum after fat liquoring processing in order to give fullness and better fibres closure particularly indicated for splits leather.*
