

BINDER WHT 620

Description

Acrylic polymer and fillers

Specifications

Appearance	white creamy emulsion
Total solids (%)	28±1
pH	8-9

Employment Field

BINDER WHT 620 is a compact product based on acrylic, wax and a novel technology of matting polymers designed specifically for white and pastel colour leathers finishing systems. His film is white and has excellent fastness to heat and light yellowing. His excellent balance of softness and print retention makes this product the ideal choice as base coat application for buffed and full grain upholstery and show upper leather where embossing is needed. It is generally used by airless, padding or roller coat application with the addition of 16-20% of pigment adjusting viscosity around 50" - 60" (ford cup nr.4)
