Specifications

<i>Appearance</i>	<i>opalescent fluid</i>
<i>Dry residue (%)</i>	16 ± 1
<i>pH</i>	8 ± 1
<i>Charge</i>	<i>anionic</i>

Employment Field

LIGANTE FR gives a soft, transparent and bright film, with good light fastness and pleasant feel. It is recommended in glazed finishing, polishable bottoms and glossy top coats, where it gives a good final bright effect. It increases hot iron fastness and can be cross-linked with formaldehyde or other similar products.
