

LIGANTE PP

Description

Not thermoplastic binder based on plasticized and modified prote

Specifications

Appearance *viscous amber fluid*

Dry residue (%) 12 ± 2

pH (dil. 1:10) 9 ± 1

Charge *anionica*

Employment Fiel

LIGANTE PP forms a medium-soft film with good light fastness and a pleasant feel.

Above all it is used in glazable finishing, giving a good final bright effect.

When used as top coat, it increases resistance to wet-rubbing and hot iron. It is fixable with formaldehyde or other similar products.
