

SYNTAL 854

Description

Oils and emulsifiers

Specifications

Appearance	Yellowish fluid
Total solids (%)	90%
Charge	Non ionic

Employment Field

SYNTAL 854 is a non-ionic oil blend emulsifiable in water, used in several type of finishing.

It is mixable with anionic or cationic products resulting in an extreme versatile product.

When used alone in concentrated form it gives good degree of pull-up effect.

Diluted with water in combination with caseins or other pre-bottom finishing products, both cationic or anionic, it provides a very soft and pleasant feel and a particular natural oily handle.
