

BINDEX K 847

Description

POLISHABLE PRE- BOTTOM

Specifications

<i>Appearance</i>	<i>Viscouse white fluid</i>
<i>Total solids (%)</i>	<i>29,0 +/- 1 %</i>
<i>pH</i>	<i>4,5-6,5</i>

Employment Fiel

BINDEX K 847 is a slightly cationic product with high levelling and sealing properties, studied to be used as pre-bottom coat. After polishing operation the grain looks very closed and smooth with medium shine appearance. It is normally used in combination with KP pigments and if necessary PRIMEX CUD 44 can be added.

BINDEX K 847 is also suitable for glazed leather.

To obtain good results we suggest to dilute 1: 3 with water.
