### Description

Cationic emulsion of waxes, protein substances, softeners and p

---

### Specifications

<i>Appearance</i>	<i>White viscous fluid</i>
<i>Dry residue (%)</i>	$20 \pm 1$
<i>pH</i>	$3,5 \pm 1$
<i>Charge</i>	<i>cationic</i>

---

### Employment Fiel

*WAX FINISH 300 K is normally used in pre-grounds on leathers with blind grain or on buffed leathers, where it helps in hiding the defects, uniforming absorption and sealing the surface, maintaining a natural aspect on the finished leather. It can be used in covering mixture together with OXY K series pigments, increasing the sealing power and keeping a soft, silky and natural coat.*
