Employment Fiel

Masteroil Pull is mix of natural and syntetic oils non mixable in water , selected to obtain a strong long lasting pull-up effect on wide range of leathers.

It is generally applied by roller preferably with heated cylinders at 35- 50 C .

After the application that varies from 5 to 12 gr/ ft 2 , leathers rests overnight and then normally ironed by rotopress at 120 C / 100 ATM .

MASTEROIL PUL confers to leathers a slightly gresy touch and dark pull up effect.
