

WAX FINISH 53 C

Description

Auxiliary based on waxes and synthetic binders

Specifications

<i>Appearance</i>	<i>White fluid</i>
<i>Dry residue (%)</i>	25 ± 2
<i>pH</i>	$8,5 \pm 1$

Employment Field

*WAX FINISH 53 C is a watery dispersion of synthetic hard waxes and selected auxiliaries.
It forms a white, matt, hard, not elastic and not sticky film.
It is used alone, pre-diluted with water, on buffed and full grain leathers, previously coated, to obtain pull-up and waxed effects.
Top coats, both in water and solvent, have no problem of adhesion, and improves the wet and dry rub fastness.*
