

## LIVELLANTE K 3

---

### Description

FLOW AND LEVELLING AID

---

### Specifications

*Appearance*                      *Yellow fluid*

*Total solids (%)*                *1,2- 2 ,0 %*

---

### Employment Fiel

*This product is a flow aid package based on fluoro surfactants, to be used as a levelling and wetting aid for the water borne coatings on difficult to wet or non-absorbing substrates. It is used at low levels of 1-4% and it will reduce the surface tension of the water based coating achieving perfect flow and levelling of spray coat applications .*
