| <i>Appearance</i> | <i>white liquid</i> |
| <i>Dry residue (%)</i> | 20 ± 2 |
| <i>pH</i> | 3 ± 1 |
| <i>Charge</i> | <i>weakly anionic</i> |

Employment Fiel

LIVELLANTE RW is mainly used as waterproofing agent on crust leathers; it can be used together with water finishings in order to obtain a great resistance to water and dirtiness. It can be utilized as pre-bottom, in fact it uniforms the adsorption of the surface, without prejudicing the adhesion of the following layers. LIVELLANTE RW has to be applied by spray after a dilution with water in all proportions.
