

RM 1080

Description

RHEOLOGICAL ADDITIVES

Specifications

<i>Appearance</i>	<i>Cloudy white</i>
<i>Viscosity</i>	<i>Max 5000 cPs</i>
<i>Total solids (%)</i>	<i>23,5-25-5%</i>

Employment Field

RM 1080 is a 25% solution designed for use in base coat and top coats containing small-particle-size emulsions and high-volume-solids system.

RM 1080 is an additive with superior thickening efficiency in the high-shear range beyond that of their thickeners.

APPLICATIONS

- *Gloss emulsion top coat*
- *Satin-gloss emulsion top coat*
- *Base coat applications, based on pure acrylic or copolymer binders*
