

SYNTAL NBK

Description

Fixing agent for nubuk and suede leathers.

Specifications

<i>Appearance</i>	<i>whitish liquid</i>
<i>pH</i>	<i>8,5 ± 1</i>

Employment Field

SYNTAL NBK is mainly used on nubuk and suede when a better dye fixation is required.

It doesn't spoil hair, giving a soft and silky touch, with a natural aspect. Besides it permits the addition of anilines and pigments in order to obtain a small adjustment of final tone.

With SYNTAL NBK, most of the natural defects of the leather are covered, obtaining very uniform articles, with fine hair.
