Description

Surfactant agents

Specifications

<i>Appearance</i>	<i>Yellowish liquid</i>
<i>Active matter (%)</i>	<i>14,5 - 17,0</i>
<i>pH</i>	<i>8,0 - 10,5</i>

Employment Field

LIVELLANTE WS-15 is a totally solvent-free finishing auxiliary that can take the place of conventional penetrating agents containing solvents.

This product can be used to formulate applicative recipes, such as full or corrected grain impregnation, and to improve the capacity for wetting back and for the absorption of base coats, by greatly increasing their adhesion to the leathers.
