

AQ SYSTEM 470 LUX

Description

Specifications

<i>Appearance</i>	<i>milky liquid</i>
<i>Total solids (%)</i>	<i>11,5 – 12,5 %</i>
<i>pH</i>	<i>7,0-8,0</i>

Employment Field

AQ SYSTEM 470 LUX is an aliphatic polyurethane polymer in water dispersion with semi-gloss film formation and excellent light fastness characteristics, studied as a top coat finishing product for several kinds of leather. It is used as top coat for upholstery and cloth leather thanks to his very natural feel and milling characteristics. It can be used in combination with AQ SYSTEM MATT series in order to balance the degree of dull required resulting in very easy and flexible water born top coat system. It is generally cross linked with TOP RT CONC. (1-2 %) developing excellent wet rub resistance without changing feels and softness. AQ SYSTEM 470 LUX is a ready to use products. Mix very well before using.
