

AQ SYSTEM 535 LUX

Description

PU top coat

Specifications

<i>Appearance</i>	<i>clear liquid</i>
<i>pH</i>	<i>8 - 10</i>
<i>Active matter (%)</i>	<i>20 - 23</i>

Employment Field

AQ SYSTEM 535 LUX is an aliphatic polyurethane polymer in water dispersion with semi-gloss film formation and excellent light fastness characteristics, studied as a top coat finishing product for several kinds of leather. It is used as top coat for upholstery and cloth leather thanks to its natural feel and milling characteristics.
