

AQ SYSTEM 566 MATT

Description

Specifications

<i>Appearance</i>	<i>milky liquid</i>
<i>Total solids (%)</i>	<i>24-26</i>
<i>pH</i>	<i>7,5-9</i>

Employment Field

AQ SYSTEM 566 MATT is an aliphatic polyurethane in water dispersion with light and water resistance characteristics, studied as a dull top coat product for high performance upholstery leather and high matt appearance. It is used with success for its excellent degree of dull, print retention, persistent also after prolonged milling process. It is generally crosslinked with TOP RT (1-2%) or CRX 3170 (5-10 %) giving excellent wet rub resistance and flexing endurance without changing its natural feel and softness. AQ SYSTEM 566 MATT is not a ready to use product. Mix 1:1 with water before using.
