

Primex 535

Description

aliphatic polyurethane dispersion

Specifications

<i>Appearance</i>	<i>translucent liquid</i>
<i>Dry residue (%)</i>	<i>36 – 38</i>
<i>pH</i>	<i>8.8-9.8</i>

Employment Fiel

Primex 535 is an aliphatic polyurethane in water dispersion with ultrafine particles, studied for water top-coat finishing with excellent brightness and high water resistance characteristics such as typical of automotive leathers items .

It is not sticky and it has an excellent soft feel and re-adhesion properties together with excellent wet rub , flexing resistance and light fastness .

It can be crosslinked with CRX isocyanate series (5-8%) in order to boost performance.

Characteristics reported in this technical literature are merely indicative. Update product specifications are available upon request
