

## WASSERLAC 21/85

---

### Description

CLEAR MODIFIED NITROCELLULOSE IN WATER EMULSIO

---

### Specifications

<i>Appearance</i>	<i>Milky liquid</i>
<i>pH (dil. 1:10)</i>	<i>4,0 – 6,0</i>
<i>Total solids (%)</i>	<i>15 ± 1%</i>

---

### Employment Fiel

*Wasserlac 21/85 is a plasticized nitro-emulsion. used as fixing agent for shoe-upper, garment and leathersgoods items . It confers to the leather an uniform appearance, high brightness and a smooth fine touch . Wasserlac 21/85 provides great improvement in wet end dry rub fastness to leathers giving also very good milling and hot ironing characteristics. It is used diluted water with the following proportion: from 2:1 to 1:1 max. Another use is as an additive in resinated base coat to improve wet fastness and strongly decrease tackyness.*
