

## WASSERLAC 3013

---

### Description

NITROCELLULOSE EMULSION

---

### Specifications

<i>Appearance</i>	<i>white fluid</i>
<i>Dry residue (%)</i>	<i>14,0 +/- 1,0%</i>
<i>Flammability</i>	<i>&gt; 60° C ( seta flash closed cup )</i>
<i>Phase</i>	<i>Organic</i>

---

### Employment Fiel

*Wasserlac 3013 is a plasticised nitrocellulose emulsified in water/solvent system designed as intermediate top prior to embossing operation. It has been specifically developed for plate embossing type of operation providing a perfect release and boosting print retention characteristics.*

*It is also used as final top coat for shoe-upper or garment leathers giving a moderate gloss and a smooth surface with pleasant feel.*

*It can be used diluted water in ratio of 1 : 1 to 1 : 1,5 .*
