

## BINDER M-PR 204

---

### Description

COMPACT BINDER

---

### Specifications

Appearance	white creamy emulsion
Dry residue (%)	22,5% - 24%
pH	7,5 – 9,5
Charge	anionic

---

### Employment Field

*BINDER M-PR 204 is a compact product based on acrylic polymer and selected wax emulsion in water designed to attain an extremely soft and elastic finishing for base coat where high film forming characteristics are required .*

*It is used particularly for soft upholstery leathers buffed, correct grain or pre-embossed.*

*Thanks to its special characteristics, it is possible to achieve very good covering power in base coat with minimum quantity add-on resulting, after dry mill operation, in a particular naturality and softness together with high uniformity of leather surface.*

*In addition BINDER M-PR 204 has an excellent adhesion power, cold crack resistance and wet rub fastness.*
