

BINDER WHT 110

Description

Specifications

<i>Appearance</i>	<i>Aspect white creamy emulsion</i>
<i>Total solids (%)</i>	<i>25,0 +/- 1,0 %</i>
<i>pH</i>	<i>8,0 – 9,0</i>

Employment Field

BINDER WHT 110 is a compact product based on acrylic, wax and a novel technology of matting polymers designed specifically for white and pastel colour leathers finishing systems..

It is studied to achieve base coat finishing with very high degree of coverage , uniformity and extreme softness.

Compare to BINDER WHT 210 it gives more covering therefore it is particularly indicated for lower degree and deeply buffed leather.

Thanks to its white film and to its excellent fastness to heat and light yellowing, it is particularly indicated for finishing of light colour such as corrected grain flat or pre-embossed leather for upholstery .
