

WASSERLAC N 75/OP

Description

Specifications

<i>Appearance</i>	<i>white liquid</i>
<i>Total solids (%)</i>	<i>13,0 – 15,0 %</i>
<i>Flammability</i>	<i>> 100°C</i>

Employment Field

Wasserlac N75/OP is a modified nitrocellulose emulsion in water, used as intermediate top to reduce basecoat's tackiness thus facilitate piling and embossing operation for upholstery leather production . It provide a semi-matt aspect, smooth and a pleasant surface feel.

It is normally used diluted in water from 1:1 to 1 : 0,5 depending on type of application.

It is recommended to prepare product dilution prior it use and do not store diluted product for long time
